

P30® - Portfolio, Programme & Project Offices Consulting, Training & Certification

What is P30 (Portfolio, Programme & Project Offices)?

A P30 model supports decision making and delivery of an organization's change portfolio. The P30 guide describes principles, processes, functions and services that can be applied within a portfolio, programme or project office. The guide also describes P30 models and roles that may be applied within different business environments and the relationships between P30 offices and corporate functions.

In an ever changing business environment a well designed P30 will provide governance structures to optimize return from investments and achievement of strategic objectives.
